Independent Auditors' Report

To the Shareholders of Dhivehi Raajjeyge Gulhun PLC

Opinion

We have audited the consolidated financial statements of Dhivehi Raajjeyge Gulhun PLC and its subsidiary (the Group), which comprise the consolidated statement of financial position as at 31st December 2024, the consolidated statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes to the consolidated financial statements, comprising material accounting policies and other explanatory information set out in pages 6 to 47.

In our opinion, the accompanying consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31st December 2024, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standard).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code") together with the ethical requirements that are relevant to our audit of the consolidated financial statements in Maldives and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Revenue Recognition

(Refer to the accounting policies and critical accounting estimates, assumptions and judgments in notes 4.14 and 5 (c) of the consolidated financial statements)

Risk Description

Revenue recognition is one of the complex areas of accounting especially with the added complexity of the vast array of rapidly changing offers, complexity of billing systems, complexity of products and services and due to high volume of low value transactions captured by the billing systems.

Our response

Our audit procedures in this area included:

 Obtaining an understanding and assessing the design and implementation management's key internal controls relating to material revenue streams.

Key Audit Matters (Continued)

Revenue Recognition (Continued)

Risk Description

The majority of the Group's revenue is generated through the billing system. Determining when and how much revenue is recognized from customer contracts has a significant impact especially on multiple arrangements and customer offers.

Further, there is a potential risk that revenue is subject to overstate to meet the expectation of the management. Therefore, we identified revenue recognition as a key audit matter because of the complexity and the inherent risk related to the accuracy and existence of revenue recorded.

Our response

- Testing of operative effectiveness of key management's key internal controls relating to material revenue streams involving IT audit specialist.
- Involving our IT specialists to review the input of terms and pricing of different services; accuracy of the data captured by different systems and interfaces between the systems.
- On sample basis, performed substantive audit procedures based on our industry knowledge which basis of the;
 - Revenue reconciliation of the material revenue streams.
 - Adjustments which are outside of the normal billing process,
 - Deferred revenue and cost on installation which is considered as a part of the overall performance obligation of the respective services.
- Assessing the appropriateness of the Group's accounting policies set out in notes 4.14 and 5 (c), and adequacy of the disclosures for compliance with the revenue recognition requirements of the International Financial Reporting Standards.

Key Audit Matters (Continued)

Capitalization of Assets including useful lives, depreciation and impairment

(Refer to the accounting policies and critical accounting estimates, assumptions and judgments in notes 4.4, 5 (a), 5 (b) and 5 (g) of the consolidated financial statements)

Risk Description

The Group continues to incur a significant level of capital expenditure in connection with the expansion of its network coverage and improvements to network quality. The carrying value of Property and Equipment was MVR 2,366 million as at 31st December 2024.

There are number of areas where management judgment impacts the carrying value of Property and Equipment, and the related depreciation profiles.

The complex nature of the assets may result in inappropriate capitalization of the costs and inappropriate determination of the date and the values transferred from construction in progress to property and equipment.

Telecommunication industry is evolving continually due to changes in the technology. Further, the Group has significant number of physical assets related to telecommunication subject to the technological update. Therefore, technology changes would create obsolescence of Property and Equipment, which might require an impairment provision.

We consider this area as key audit matter because determination of capitalization date, useful lives and recoverable amount of Property and Equipment involves judgments and estimates. Therefore, an error in such estimates could result in material misstatements in the separate financial statements.

Our response

Our audit procedures in this area included:

- Obtaining an understanding of and assessing the design, implementation and operating effectiveness of management's key internal controls over the capitalization of property and equipment, including the key internal controls over the estimation of useful economic lives of assets;
- Evaluating the appropriateness of capitalization policy and testing on a sample basis whether the cost capitalized meets the relevant criteria for capitalization and the depreciation is correctly calculated;
- Challenging the date of transferring construction-in-progress to Property and Equipment by examining the inspection reports and/or project progress reports, on a sample basis;
- Evaluating management's estimation of useful economic lives by considering our knowledge of the business;
- Inquiring the networks and the other relevant teams in order to assess on technological updates and actual replacements of assets, if any, with latest technology to identify any potential impairment indicators for the existing assets;
- Assessing whether there were impairment triggers giving rise to a need to perform a comprehensive impairment review of Property and Equipment based on the internal and external information assessed:
- Challenging the management's positions of the impairment assessment as to whether or not a reasonable possible change to key operating assumptions could result in impairment;
- Assessing the adequacy of the consolidated financial statements disclosures included in notes 4.4, 5 (a), 5 (b) and 5 (g).

Other Information

The Board of Directors (the "Board") is responsible for the other information. The other information comprises the information included in the annual report but does not include in the consolidated financial statements and our auditors' report thereon. The annual report is expected to be made available to us after the date of this auditors' report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to the Board.

Responsibilities of the Board of Directors for the Consolidated Financial Statements

The Board is responsible for the preparation and the fair presentation of consolidated financial statements in accordance with IFRSs, and for such internal control as the Board determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Board is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the Group's financial reporting processes.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements (Continued)

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board.
- Conclude on the appropriateness of Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the separate financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the group financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Board regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Board with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, action taken to eliminate threats or safeguards applied.

From the matters communicated with the Board, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

(c) Functional and Presentation Currency

These consolidated financial statements are presented in Maldivian Rufiyaa, which is also the Group's functional currency. All financial information presented in Maldivian Rufiyaa has been rounded to the nearest thousand except where otherwise indicated.

(d) Going Concern basis of Accounting

The consolidated financial statements have been prepared on a going concern basis.

(e) Use of Estimates and Judgements

The preparation of consolidated financial statements in conformity with IFRSs requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

2. Basis of preparation (Continued)

(e) Use of Estimates and Judgements (Continued)

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected. Information about significant areas of estimation, uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the consolidated financial statements are discussed in Note 4 to the consolidated financial statements.

3. Changes in material accounting policies

The Group has adopted Classification of Liabilities as Current or Non-current (Amendments to IAS 1) and Non-current Liabilities with Covenants (Amendments to IAS 1) from 1st January 2024. The amendments apply retrospectively. They clarify certain requirements for determining whether a liability should be classified as current or non-current and require new disclosures for non-current loan liabilities that are subject to covenants within 12 months after the reporting period. The Group's liabilities were not impacted by the amendments.

4. Material accounting policies

The Group has consistently applied the following accounting policies to all accounting periods presented in these consolidated financial statements, except if mentioned otherwise.

4.1 Basis of Consolidation

4.1.1. Business Combinations

The Group accounts for business combinations using the acquisition method when control is transferred to the Group. The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired. Any goodwill that arises is tested annually for impairment. Any gain on a bargain purchase is recognized in profit or loss immediately. Transaction costs are expensed as incurred, except if it is related to the issue of debt or equity securities. The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognized in profit or loss.

Any contingent consideration is measured at fair value at the date of acquisition. If an obligation to pay contingent consideration that meets the definition of a financial instrument is classified as equity, then it is not re-measured, and settlement is accounted for within equity. Otherwise, other contingent consideration is re-measured at fair value at each reporting date and subsequent changes in the fair value of the contingent consideration are recognized in profit or loss.

If share-based payment awards (replacement awards) are required to be exchanged for awards held by the acquiree's employees (acquiree's awards), then all or a portion of the amount of the acquirer's replacement awards is included in measuring the consideration transferred in the business combination. This determination is based on the market-based measure of the replacement awards compared with the market-based measure of the acquiree's awards and the extent to which the replacement awards relate to pre-combination service.

4.1.2. Subsidiary

Subsidiary is an entity controlled by the Group. The Group controls an entity when it exposed to or has right to, variable return from its investment with entity and has the ability to effect those return through its power over the entity. The financial statements of subsidiary are included in the consolidated financial statements from the date that control commences until the date that control ceases. The accounting policies of subsidiary have been changed when necessary to align them with the policies adopted by the Group.

4. Material accounting policies (Continued)

4.1 Basis of Consolidation (Continued)

4.1.3. Non-controlling Interests

NCI are measured initially at their proportionate share of the acquiree's identifiable net assets at the date of acquisition. Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

4.1.4 Loss of Control

When the Group loses control over a subsidiary, it de-recognizes the assets and liabilities of the subsidiary, and any related NCI and other components of equity. Any resulting gain or loss is recognized in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

4.1.5 Transaction Eliminated on Consolidation

Intra-group balances and transactions, and any unrealized income and expenses arising from intragroup transactions, are eliminated in preparing the consolidated financial statements. Unrealized gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealized losses are eliminated in the same way as unrealized gains, but only to the extent that there is no evidence of impairment.

4.2 Transactions in foreign currencies

Transactions in foreign currencies are translated to Maldivian Rufiyaa (functional currency) at the exchange rates prevailing at the date of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies as at the reporting date are recognized in profit or loss.

Non-monetary assets and liabilities, which are stated at historical cost, denominated in foreign currencies are translated to Maldivian Rufiyaa at the exchange rates ruling at the date of transaction. Non-monetary assets and liabilities, which are stated at fair value, denominated in foreign currencies are translated to Maldivian Rufiyaa at the foreign exchange rates ruling at the dates that the fair value was determined.

4.3 Financial Instruments

(i) Financial Assets (Non-derivative)

Recognition and initial measurement

The Group initially recognizes receivables and deposits on the date that they are originated. All other financial assets are recognized initially on the trade date at which the Group becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

Classification and Subsequent Measurement

On initial recognition, a financial asset is classified as measured at: amortised cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

- Material accounting policies (Continued)
- 4.3 Financial Instruments (Continued)
 - (i) Financial Assets (Non-derivative) (Continued)

Classification and Subsequent Measurement (Continued)

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows;
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Business model assessment

The Group makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed, and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets.
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed.

Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Group considers:

- Contingent events that would change the amount or timing of cash flows.
- Terms that may adjust the contractual coupon rate, including variable-rate features;
- Prepayment and extension features; and
- Terms that limit the Group's claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract.

4. Material accounting policies (Continued)

4.3 Financial Instruments (Continued)

(i) Financial Assets (Non-derivative) (Continued)

Subsequent measurement and gains and losses

Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on de-recognition is recognised in profit or loss. Financial assets at amortized cost comprise trade and other receivables, Bank deposits and Investment in fixed deposits.

(ii) Financial liabilities (Non-derivative)

Classification, subsequent measurement and gain and losses

The Group initially recognizes debt securities issued and subordinated liabilities on the date that they are originated. All other financial liabilities are recognized initially on the trade date at which the Group becomes a party to the contractual provisions of the instrument.

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial Liabilities at FVTPL are measured at fair value and net gains and losses, including interest expenses are recognized in profit or loss.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on de-recognition is also recognised in profit or loss. The Group has the non-derivative financial liabilities such as trade and other payables and amounts due to related party.

Such financial liabilities are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, these financial liabilities are measured at amortized cost using the effective interest method.

De-recognition

Financial Assets

The Group derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Group is recognized as a consolidated asset or liability.

Financial Liabilities

The Group derecognizes a financial liability when its contractual obligations are discharged or cancelled or expire.

(iii) Share Capital

Ordinary Shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognized as a deduction from equity.

4. Material accounting policies (Continued)

4.3 Financial Instruments (Continued)

(iii) Share Capital

Dividends

Interim dividends to ordinary shareholders are recognised as a liability in the period in which they are declared and final dividends are recognised as a liability in the period which they are approved by the shareholders.

4.4 Property, Plant and Equipment

(i) Recognition and Measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use and capitalized borrowing costs.

The estimated costs of dismantling and removing an asset and restoring the site on which it is located are also included in the cost of property, plant and equipment. The corresponding obligation is recognised as a provision. Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as consolidated items (major components) of property, plant and equipment. Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognized net within other income in profit or loss.

(ii) Subsequent Costs

The cost of replacing a part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group, and its cost can be measured reliably. The carrying amount of the replaced part is derecognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in profit or loss as incurred.

(iii) Depreciation

Depreciation is calculated over the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value. Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset.

The estimated useful lives for current and comparative years are as follows:

Buildings 5 to 40 years
Property and equipment - Civil works, cables and ducting 5 to 40 years
- Network and electronic equipment 5 to 40 years
Vehicle and launches 4 to 7 years
Furniture and fittings 4 to 10 years

Depreciation methods, useful lives and residual values are reviewed at each financial year end and adjusted prospectively, if appropriate.

4. Material accounting policies (Continued)

4.4 Property, Plant and Equipment (Continued)

(iv) Capital Work in Progress

Assets under construction as at the year-end represents the costs incurred or accrued for the projects which are not commissioned for commercial operation as at the year end.

4.5 Intangible assets

(i) Recognition and Measurement

Intangible assets that are acquired by the Group, which have finite useful lives, are measured at cost less accumulated amortization and accumulated impairment losses.

Costs that are directly associated with the purchase and implementation of identifiable and unique software products by the Group are recognized as intangible assets. Expenditures that enhance and extend the benefits of computer software programmes beyond their original specifications and lives are recognized as a capital improvement and added to the original cost of the software.

(ii) Subsequent expenditure

Subsequent expenditure is only capitalized if costs can be measured reliably, the product is technically and commercially feasible, future economic benefits are probable and the Group has sufficient resources to complete development and to use the asset.

(iii) Amortization

Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use. The estimated useful lives for the current and comparative periods are as follows:

Software 3 to 10 Years

Licences 10 Years or licence term whichever is lower

Indefeasible right to use cable capacity 15 Years or cable life whichever is lower

Amortization method, useful lives, and residual values are reviewed at each reporting date and adjusted if appropriate.

(iv) Capital Work in Progress

Capital work in progress as at the year-end represents the costs incurred or accrued for the projects which have not commenced commercial operations as at the year end.

4.6 Inventories

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the weighted average principle, and includes expenditure incurred in acquiring the inventories, conversion costs and other costs incurred in bringing them to their existing location and condition.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

4.7 Cash and Cash Equivalents

Cash and cash equivalents are defined as cash in hand, bank demand deposits and short term highly liquid investments readily convertible to known amounts of cash and subject to insignificant risk of changes in value.

4. Material accounting policies (Continued)

4.8 Contract assets related to the Enterprise Sales Projects

Contract assets related to the sales project represents the gross unbilled amount expected to be collected from customers for performance obligations satisfied to date. It is measured at the consideration allocated to the performance obligations completed as at the reporting date recognised to date less progress billings and recognised losses.

Cost includes all expenditure related directly to specific projects and an allocation of fixed and variable overheads incurred.

If progress billings exceed costs incurred plus recognised profits, then the difference is presented as deferred income in the statement of financial position.

4.9 Impairment

(i) Non-derivative financial assets

Financial instruments and contract assets

The Group recognises loss allowances for ECLs on:

- Financial assets measured at amortised cost; and
- Contract assets.

The Group measures loss allowances at an amount equal to lifetime ECLs for trade and other receivables.

Loss allowances for trade receivables and contract assets are always measured at an amount equal to lifetime ECLs.

The Group monitor the changes in credit risk by tracking published external credit ratings. To determine whether published ratings remain up to date and to assess whether there has been a significant increase in credit risk at the reporting date that has not been reflected in published ratings, the Group supplements this by reviewing changes in bond yields and, where available, credit default swap (CDS) prices together with available press and regulatory information about debtors.

The Group considers a financial asset to be in default when:

- The borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- The financial asset is more than 90 days past due for the residential segment.
- The financial asset is more than 150 days past due for the Government segment.
- The financial asset is more than 120 days past due for the corporate segment.

The Group has rebutted the presumption of 90 days past due for the Government and corporate segment as the Group has assessed the previous years' collections and the historic collections at a considerable level after 3 months period.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

4. Material accounting policies (Continued)

4.9 Impairment (Continued)

(i) Non-derivative financial assets (Continued)

Financial instruments and contract assets (Continued)

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group expects to receive).

Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortised cost are credit impaired. A financial asset is 'credit impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- A breach of contract such as a default or being more than 180 days past due of the significant government customers who exceed MVR 100,000/-;
- A breach of contract such as a default or being more than 180 days past due of the significant corporate customers who exceed MVR 100,000/-;
- A breach of contract such as a default or being more than 365 days past due of the wholesale customers.
- It is probable that the contractual party will enter bankruptcy or other financial reorganisation.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write-off

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For individual customers, the Group has a policy of writing off based on historical experience of recoveries of similar assets and based on the assessment carried out by the Group. For wholesale segment customers, the Group individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Group expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

(ii) Non-financial assets

At each reporting date, the Group reviews the carrying amounts of its non-financial assets (inventories, contract assets and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs.

4. Material accounting policies (Continued)

4.9 Impairment (Continued)

(ii) Non-financial assets (Continued)

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs of disposal. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount. Impairment losses are recognised in profit or loss.

4.10 Employee Benefits

(a) Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which the Group pays fixed contributions into a consolidated entity and will have no legal or constructive obligation to pay further amounts.

The Group contributes 10% of members' salary into the scheme with an additional, minimum, 4% of salary being contributed by the members.

(b) Short-term benefits

Short-term employee benefit obligations of the Group are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimate reliably.

4.11 Provisions

A provision is recognized if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

If the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of discount is recognised as finance cost.

Network and asset retirement obligation provision has been made for the best estimate of the present value of the unavoidable future cost of dismantling and removing the items of property, plant and equipment and restoring the sites on which they are located.

4.12 Leases

At inception of a contract, the Group assesses whether a contract is, or contains. a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

(i) As a lessee

At commencement or on modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Group has elected not to consolidated non-lease components and account for the lease and non-lease components as a single lease component.

4. Material accounting policies (Continued)

4.12 Leases (Continued)

(i) As a lessee (Continued)

The Group recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or the cost of the right-of-use asset reflects that the Group will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability. The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or. if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

The Group determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

Lease payments included in the measurement of the lease liability comprise the following:

- Fixed payments, including in-substance fixed payments;
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- Amounts expected to be payable under a residual value guarantee; and
- The exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is measured at amortized cost using the effective interest method. It is re measured when there is a change in future lease payments arising from a change in an index or rate. if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, if the Group changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is re-measured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Group presents right-of-use assets that do not meet the definition of investment property in "Right-of-use assets" and lease liabilities in "Lease liabilities" in the statement of financial position.

Short-term leases and leases of low-value assets

The Group has elected not to recognize right-of-use assets and lease liabilities for leases with contract term less than one year considered as low-value assets or short-term leases, including IT equipment. The Group recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

4. Material accounting policies (Continued)

4.13 Events occurring after the reporting date

The materiality of the events occurring after the reporting date has been considered and appropriate adjustments and provisions have been made in the consolidated financial statements wherever necessary.

4.14 Revenue from contracts with customers

Revenue is measured based on the consideration specified in the contract with a customer. The Group recognise revenue when it transfers control over a good or service to a customer.

(a) Sale of equipment

Revenue from handset and other equipment sales is recognised when the product is delivered to the customer. In revenue arrangements from bundled contracts include more than one Performance Obligation (PO), the arrangement consideration is allocated to each performance obligation based on their relative standalone selling price (SSP).

(b) Provision of services

Revenue for access charges, airtime usage and messaging by contract customers is recognised as services are performed, with unbilled revenue resulting from services already provided accrued at the end of each period and unearned revenue from services to be provided in future periods deferred.

Revenue from the sale of prepaid credit is deferred until such time as the customer uses the airtime, or the credit expires. Deferred revenue related to unused airtime is recognised when utilised by the customer. Upon termination of the customer contract, all deferred revenue for unused airtime is recognised in the profit or loss.

Revenue from interconnect fees is recognised at the time the services are performed. Revenue from data services is recognised when the Group has performed the related service and, depending on the nature of the service, is recognised either at the gross amount billed to the customer or the amount receivable by the Group as commission for facilitating the service.

(c) Installation revenue

Installation services are specific services and does not have a standalone value without the data/internet services, it has not been considered as consolidated performance obligation.

The installation revenue is considered as part of the overall transaction price and is amortized over the expected tenure of the contracts with the customers.

(d) Sales projects

Installation, device sale and service provision are considered to be consolidated Performance Obligation as those are distinct goods/ services. The customer can obtain each of the said good/ service on a standalone basis from different vendors and each has a standalone value to the customer.

Standalone selling prices ("SSP") is determined for installation service, sale of device and provision of service. Accordingly, transaction price collected from the customers are allocated to each Performance Obligation based on relative SSP allocation and recognize revenue accordingly.

(e) Contract costs

Contract costs that are incremental in obtaining a contract with a customer are capitalized and amortised over the period of related revenues. Applying the practical expedient per IFRS 15, the Group recognises incremental cost of obtaining a contract as an expense when incurred if the amortisation period of the assets that the Group otherwise would have recognised is one year or less.

4. Material accounting policies (Continued)

4.14 Revenue from contracts with customers (Continued)

(f) Loyalty Programme

Revenue is allocated between the loyalty programme and other components of the Income. The amount allocated to the loyalty programme is deferred and is recognized as revenue when the Group has fulfilled its obligations to supply the services under terms of the programme or when it is no longer probable that the points under the programme will be redeemed.

4.15 Expenditure

(a) Finance income and expense

Finance income comprise interest income on funds invested. Interest income is accrued on a time basis by reference to the principal outstanding and the effective interest rate applicable. Finance costs comprise, unwinding of discounts on provisions, unwinding of discount on lease liabilities and foreign exchange losses that are recognised in profit or loss. Foreign exchange gains and losses are reported on net basis.

The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- The gross carrying amount of the financial asset; or
- The amortised cost of the financial liability.

In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

(b) Operating Expenses

All expenses incurred in the running of the business and in maintaining the capital assets in a state of efficiency has been charged to the profit or loss for the year.

Expenses incurred for the purpose of acquiring, expanding or improving assets of a permanent nature by means of which to carry on the business or for the purpose of increasing the earning capacity of the business has been treated as capital expenses.

4.16 Tax Expenses

Tax expense comprises current and deferred tax. Current tax and deferred tax is recognized in profit or loss. The Group has determined that interest and penalties related to income taxes, including uncertain tax treatments, do not meet the definition of the income taxes, and therefore accounting for them under IAS 37, provision, contingent liabilities and contingent assets.

(a) Current tax

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantially enacted at the reporting date.

(b) Deferred tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

4. Material accounting policies (Continued)

4.16 Tax Expenses (Continued)

(b) Deferred tax (Continued)

Deferred tax is not recognised for the temporary differences on the initial recognition of assets or liabilities in a transaction that does not affects neither accounting nor taxable profit or loss and (if) does not give rise to equal taxable and deductible temporary differences at the time of the transaction.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on the reversal of relevant taxable temporary differences. If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on the business plan of the Group. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met.

4.17 Determination of Fair Values

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/ or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

- Level 1: Quoted prices (Unadjusted) in active market for identical assets and liabilities
- Level 2: Inputs other than quoted prices included in Level 1 that are observable for the assets
 or liability, either directly (i.e as prices) or indirectly (i.e. derived from process)
- Level 3: Inputs for the assets or liability that are not used on observable market data (unobservable inputs)

(a) Trade and other receivables

The fair value of trade and other receivables, excluding construction contracts, is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date. However, the Group has got short term receivables as at the reporting date.

(b) Financial liabilities (Non- derivative)

Fair value, which is determined for disclosure purposes, is calculated based on the present value of future principal and interest cash flows, discounted at the risk adjusted discount rate.

5. Critical accounting estimates, assumptions and judgements

In the preparation of these consolidated financial statements, a number of estimates and assumptions have been made relating to the performance and the financial position of the Group. Results may differ significantly from those estimates under different assumptions and conditions. The Directors consider that the following discussion addresses the Group's most critical accounting policies, which are those that are most important to the presentation of its financial performance and position.

5. Critical accounting estimates, assumptions, and judgements (Continued)

These policies require subjective and complex judgements, often as a result of the need to make estimates about the effect of matters that are uncertain.

(a) Depreciation of property, plant and equipment

The Group assigns useful lives and residual values to property, plant and equipment based on periodic studies of actual asset lives and the intended use for those assets. Changes in circumstances such as technological advances, prospective economic utilisation and physical condition of the assets concerned could result in the actual useful lives or residual values differing from initial estimates.

Where the Group determines that the useful life of property, plant and equipment should be shortened or residual value reduced, it depreciates the net carrying amount in excess of the residual value over the revised remaining useful life, thereby increasing depreciation expense. Any change in an asset's life or residual value is reflected in the Group's consolidated financial statements when the change in estimate is determined.

(b) Impairment of property, plant and equipment and intangible assets

The Group assesses the impairment of property, plant and equipment and intangible assets whenever events or changes in circumstances indicate that the carrying value may not be recoverable or otherwise as required by accounting standards. Factors that are considered important and which could trigger an impairment review include the following:

- Obsolescence or physical damage;
- Significant changes in technology and regulatory environments;
- Significant underperformance relative to expected historical or projected future operating results;
- Significant changes in the use of its assets or the strategy for its overall business;
- Significant negative industry or economic trends;

The identification of impairment indicators, the estimation of future cash flows and the determination of the recoverable amount for assets or cash generating units require significant judgement.

(c) Revenue recognition

Judgement is required in assessing the application of the principles of revenue recognition in respect of revenues. This includes presentation of revenue as principal or as agent in respect of income received from transmission of content provided by third parties. As per the requirements of IFRS 15 Identification of the performance obligations, allocation of the consideration over the performance obligations, determination of the key assumption such as customer expected retention period.

(d) Valuation of receivables

Note 4.9 – measurement of ECL allowance for trade receivables and contract assets: key assumptions in determining the weighted average loss rate.

The provision for impairment losses for trade and other receivables reflects the Group's estimates of losses arising from the failure or inability of customers to make required payments.

The provision is based on the individual assessment of the customers, lifetime expected credit loss of the trade and other receivables, customer credit-worthiness and the Group's historical write-off experience etc.

5. Critical accounting estimates, assumptions and judgements (Continued)

(d) Valuation of receivables (Continued)

Changes to the provision may be required if the financial condition of its customers improves or deteriorates. An improvement in financial condition may result in lower actual write-offs.

(e) Interconnection with other operators

As part of the normal course of business, the Group interconnects with other telecommunications operators. In certain instances it uses estimates to determine the amount of revenue receivable from or expense payable to these other operators. The prices at which these services are charged are sometimes regulated and may be subject to retrospective adjustment. Estimates are used in assessing the likely impact of these adjustments. Adjustments to interconnect estimates are taken to operating profit in the period in which the adjustments are made.

(f) Provisions

A provision is recognised when there is a present (legal or constructive) obligation in respect of a past event as explained in the accounting policy in Note 4.11 to the consolidated financial statements. Judgement is required to quantify such amounts.

(g) Capitalization of Property, Plant and equipment and projects under construction

Assets are transferred to Property, Plant and equipment from assets under construction when they are ready for its intended use. The complex nature of the assets is such that judgment is required as to when that point is reached. Also, judgment is required to determine whether the costs incurred on those assets can be capitalized or can be recognized as an expense in profit or loss.

(h) Lease Term

Some leases related to Land and buildings and Network assets contain extension options exercisable by the Group before the end of the contract period. The extension options held are exercisable only by the Group and not by the lessors. The Group assesses at lease commencement date whether it is reasonably certain to exercise the extension options. The Group reassesses whether is reasonably certain to exercise the option if there is a significant event or significant changes in circumstances within control.

6. Standards issued but not yet effective.

A number of new standards are effective for annual periods beginning after 1st January 2024 and earlier application is permitted; however, the Group has not early adopted the new or amended standards in preparing these consolidated financial statements.

The following amended standards and interpretations are not expected to have a significant Impact on the Group's consolidated financial statements.

- IFRS 18 Presentation and Disclosures in Consolidated financial statements (Amendments to IAS 1).
- Classification and Measurement of Financials Instruments (Amendments to IFRS 9 and IFRS 7).
- Lack of Exchangeability (Amendments to IAS 21).
- Annual Improvements to IFRS Accounting Standard Volume 11.
- IFRS 19 Subsidiaries without Public Accountability Disclosures.

FOR THE YEAR ENDED 31ST DECEMBER 2024

7 SEGMENT INFORMATION

Reportable Segments

The Group's operation is segregated into two reportable segments, which the Group operates and manages as strategic business units and organize by products and services. The Group measures and evaluates the reportable segments based on segment operating income, consistent with the Chief Operating Decision Maker's ("CODM") assessment of segment performance.

The Group makes capital allocation decisions based on the strategic needs of the business, needs of the network (mobile or fixed and broadband) providing services and to provide emerging services to the customers. The Group excludes from segment results the effects of certain items that management does not consider in assessing segment performance, primarily because of their non-operational

The Following summery describes the operations of each reportable segment.

Mobile operation primarily includes prepaid mobile, postpaid mobile, roaming, mobile equipment and mobile broadband which are provided to individuals, business and government customers.

Enterprise

(2) Fixed, Broadband and Fixed, Broadband and Enterprise primarily include fixed telephony, fixed and fiber broadband, lease circuits, datacoms, IP TV services, mobile money and enterprise infrastructure project. The Group provides these products and services to the individuals, businesses and government customers.

Information about Reportable Segments

Segment information disclosed for the year ended 31st December 2024 and 2023 are as follows:

FOR THE YEAR ENDED 31ST DECEMBER 2024

8 REVENUE

A Revenue Streams

The Group generates revenue primarily from mobile and fixed, broadband and enterprise revenue. Other sources of revenue include customer equipment maintenance services and other adjacent services.

2024	2023
MVR "000"	MVR "000"
2,786,548	2,632,337

Revenue from contracts with customers

Disaggregation of revenue from contracts with customers

Disaggregation of revenue by major products and service lines has been disclosed in the segment information under mobile, fixed, broadband and enterprise and other revenue.

In the following table, revenue is disaggregated by timing of recognition. The table also includes a reconciliation of the disaggregated revenue with the Group's reportable segments. Revenue by major products and service lines are disclosed under segment information (See Note 7).

,	Mobile		obile Fixed, Broadband and Enterprise		Others		Total	
,	2024 MVR "000"	2023 MVR "000"	2024 MVR "000"	2023 MVR "000"	2024 MVR "000"	2023 MVR "000"	2024 MVR "000"	2023 MVR "000"
Revenue by timing	of recognitio	n						
Products transferred at a point in time	32,710	25,956	53,099	43,819	4,978	3,889	90,787	73,664
Products and services transferred over time	1,442,053	1,350,803	1,172,749	1,133,766	80,959	74,104	2,695,761	2,558,673
Revenue from contracts with customers	1,474,763	1,376,759	1,225,848	1,177,585	85,937	77,993	2,786,548	2,632,337
External Revenue	1,474,763	1,376,759	1,225,848	1,177,585	85,937	77,993	2,786,548	2,632,337

C Contract balances

The following table provides information about receivables, contract assets and contract liabilities from contracts with customers.

	2024 MVR "000"	2023 MVR "000"
Receivables (included in trade and other receivables)	560,656	413,516
Contract assets (included in trade and other receivables)	313,520	247,158
Contract liabilities (included in trade and other payables)	(121,432)	(116,843)

The contract assets primarily relate to the Group's right to consideration for services performed and work completed, but not billed at the reporting date on customer contracts and costs that were deferred on installations and infrastructure projects. The contract assets are transferred to receivables when the rights become unconditional. This usually occurs when the Group issues an invoice to the customer and over the period of customer tenure expected in respect of the deferred cost.

The contract liabilities primarily relate to the advance consideration received from customers for contracts, for which revenue is recognized over time as the related performance obligations are fulfilled and to the unredeemed customer loyalty points.

FOR THE YEAR ENDED 31ST DECEMBER 2024

9	OPERATING COSTS	2024 MVR "000"	2023 MVR "000"

	Tax free allowance	(250)	(500)
	Total taxable income	1,101,167	1,109,642
	Income tax @ 15%	165,175	166,446

In accordance with the provisions of the Income Tax Act No. 25 of 2019 and subsequent amendments, the Companies of the Group is liable for income tax at the rate of 15% (2023: 15%) on its taxable income.

The effective tax rate for the year ended 31st December 2024 is 14.99% (31st December 2023: 15.81%)

12.2	Deferred Tax Asset	31/12/2024 MVR "000"	31/12/2023 MVR "000"
	Opening balance	19,889	9,869
	Recognized during the year	5,598	10,020
	Closing balance	25,487	19,889

12.3 Deferred Tax Asset / (Liability) is attributable for following:

75 (5.0)	88	31/12/2024		31/12/2023	
		Temporary Difference	Tax Effect	Temporary Difference	Tax Effect
		MVR "000"	MVR "000"	MVR "000"	MVR "000"
Property and equipment		(22,228)	(3,334)	(28,204)	(4,231)
Intangible assets		(87,599)	(13,140)	(110, 268)	(16,540)
Provisions		279,744	41,961	271,067	40,660
		169,917	25,487	132,595	19,889

Deferred tax Assets and liabilities are calculated on all taxable and deductible temporary differences arising from the differences between accounting bases and tax bases of assets and liabilities. Deferred tax is provided at the rate of 15% (2023:15%).

12.4 Unrecognized Deferred Tax Assets of the Group is attributable to the following :

	31/12	31/12/2024		/2023
	Temporary Difference MVR "000"	Tax Effect MVR "000"	Temporary Difference MVR "000"	Tax Effect MVR "000"
Accumulated Tax Losses (Note 12.4.1)	80	12	(#1	
	80	12	747	

12.4.1 The above unrecognized deferred tax asset attributable to the accumulated losses arising from the subsidiary.

The Group has not recognized related deferred tax assets since it is not probable that the subsidiary will generate future taxable profits against which these benefits could be utilized.

FOR THE YEAR ENDED 31ST DECEMBER 2024

22.1 Network and assets retirement obligation

The provisions of network and asset retirement obligations represent the provisions made for the best estimate of the present value of the unavoidable future cost of dismantling and removing the items of property and equipment and restoring the sites on which they are located.

FOR THE YEAR ENDED 31ST DECEMBER 2024

22 PROVISIONS (CONTINUED)

22.1 Network and assets retirement obligation (Continued)

The following assumptions have been used to calculate the network and asset retirement obligation as at reporting date.

	31/12/2024	31/12/2023
Useful life (years)	15 - 20	15 - 20
Expected rate of increase of the dismantling cost	3.3%	3.5%
Discount rate	10%	10%

Based on the market conditions and industry practices, the management has estimated the useful life of the towers as 20 years for all assets capitalized from 2023 onwards.

Sensitivity Analysis

An increase / (decrease) of 1% of the below variables would have increased or (decreased) the profit or loss by following amounts. This analysis assumes that the other variables remain constant.

		Effect to Profit or	
		Increase	Decrease
		MVR "000"	MVR "000"
	Expected rate of increase of the dismantle cost (Change 1%)	1,456	(1,456)
	Discount rate (Change by 1%)	(3,428)	3,740
23	LOANS AND BORROWINGS	31/12/2024	31/12/2023
		MVR "000"	MVR "000"

7 FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial Risk Management

Overview

The Group has exposure to the following risks from its use of financial instruments:

- (i) Credit risk
- (ii) Liquidity risk
- (iii) Market risk

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk, and the Group's management of capital. Further, quantitative disclosures are included throughout these Group financial statement.

Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The Board is also responsible for developing and monitoring the Group's risk management policies.

Risk management systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Group's Audit Committee oversees how management monitors compliance with the Group's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Group's Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

Treasury Policy

The Group's activities expose it to a variety of financial risks: market risk (including currency risk and interest rate risk), credit risk and liquidity risk. The Group's overall risk management programme seeks to minimize potential adverse effects on the Group's financial performance. Day to day management of treasury activities is delegated to the Group's treasury function ("Treasury"), within specified financial limits for each type of transaction and counterparty.

FOR THE YEAR ENDED 31ST DECEMBER 2024

27 FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

Financial Risk Management (Continued)

Treasury Policy (Continued)

To the extent that the Group undertakes treasury transactions, these are governed by Group policies and delegated authorities.

The key responsibilities of Treasury include funding, investment of surplus cash and the management of interest rate and foreign currency risk. The majority of the Group's cash resources (including facilities) and borrowings are managed centrally by Treasury.

(i) Credit Risk

The maximum exposure to credit risk of the financial assets at the reporting date was:

	Carrying	Amount
	31/12/2024 MVR "000"	31/12/2023 MVR "000"
	MVK 000	WIVIC 000
Trade receivables and contract assets*	704,087	506,982
Other receivables	63,714	86,712
Cash at banks	501,392	1,444,394
Short term Investments	2,191,575	1,266,337
	3,460,768	3,304,425

^{*} The carrying amount as at 31st December 2024 excludes GST amounting to MVR 39.5/- Mn (2023: MVR 28.4/- Mn)

Credit risk is the risk of financial loss to the Group if a customer or counter party to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and investments.

The carrying amount of financial assets of the Group represents the maximum credit exposure. In relation to deposits held, the management seeks to reduce the credit risk by ensuring the counterparties to all but a small proportion of the Group's financial instruments are the core relationship banks. The counterparties are selected in compliance with Group Treasury Policy. The types of instrument used for investment of funds are prescribed by the Board. These policies contain limits on exposure for the Group as a whole to any one counterparty.

Impairment Losses on financial assets and contract assets recognized in profit or loss were as follows;

31/12/2024 31/12/2023 MVR "000" MVR "000"
eivables and contract assets arising from contracts with customers 30,077 21,428
eivables and contract assets arising from contracts with customers 30,077 2

Trade and other receivables and contract assets

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, the management also considers the demographics of the Group's customer base, including the default risk of the industry and country in which customers operate, as these factors may have an influence on credit risk, particularly in the currently deteriorating economic circumstances. However, geographically there is no concentration of credit risk.

The management has established a credit policy under which each new customer is analyzed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. The Group establishes a provision for impairment that represents its estimate of expected credit losses in respect of trade and other receivables. The allowance for impairment represents the specific loss component that relates to individually significant exposures.

C----

FOR THE YEAR ENDED 31ST DECEMBER 2024

27 FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

Financial Risk Management (Continued)

(i) Credit Risk (Continued)

Trade and other receivables and contract assets (Continued)

The maximum exposure (excluding GST) to credit risk of trade receivable and contract asset at the reporting date for each segment was:

	Carrying Amount	
	31/12/2024 MVR "000"	31/12/2023 MVR "000"
Consumer Segment	45,747	37,277
Corporate Segment	190,395	147,617
Government Segment	143,346	68,446
Wholesale Segment	324,599	253,641
	704,087	506,982

Expected credit loss assessment for the customers

Exposures within each credit risk grades are segmented by the type of the customers.

The Group uses an allowance Matrix to measure the ECLs of trade receivables and contract asset of individual customers, which comprise a very large number of small customers except for its wholesale segment.

Loss rates are calculated using a 'roll rate' method based on the probability of a receivable progressing through successive stages of delinquency to write-off. Roll rates are calculated separately for exposures in different segments based on the type of the customer.

Consumer Segment

The following table provides information about the exposure to credit risk and ECLs for trade receivables and contract assets for consumer customers segment as at 31st December 2024 and 31st December 2023.

31st December 2024	Weighted average loss rate	Gross carrying amount* MVR "000"	Loss allowance MVR "000"	Net carrying amount* MVR "000"
0 - 30 days past due	3.26%	45,814	1,495	44,319
31 - 60 days past due	47.73%	2,026	967	1,059
61 - 90 days past due	75.91%	1,266	961	305
More than 90 days past due	99.64%	17,953	17,889	64
		67,059	21,312	45,747
31 st December 2023	Weighted average loss rate	Gross carrying amount* MVR "000"	Loss allowance MVR "000"	Net carrying amount* MVR "000"
0 - 30 days past due	2.65%	37,164	986	36,178
31 - 60 days past due	46.52%	1,494	695	799
61 - 90 days past due	73.15%	900	658	242
More than 90 days past due	99.82%	32,590	32,532	58
		72,148	34,871	37,277

^{*} Gross carrying amount excludes of GST

Loss rates are based on actual credit loss experience over Five years. These rates are multiplied by scalar factors to reflect differences between economic conditions during the period over which the historical data has been collected, current conditions and the Group's view of economic conditions over the expected lives of the receivables.

The Group has assessed individual consumer customers and recognized a 100% specific provision of MVR 115,861/- as at 31st December 2024 (31st December 2023: MVR 268,022/-).

Expected credit loss assessment for individual specific wholesale customers as at 31st December 2024

Specific provision would be made for any of the following indicators;

- If the customer (roaming or carrier partners) declare bankruptcy, the full amount receivable should be provided, unless there is a high probability of recovering the debt.
- If the customer is having known financial problems, it would considered for specific provision.
- If there are on-going disputes for the receivable amounts from a customer, the amount receivable shall be assessed for the possible risk and management would decide on the provision required on case-by case basis.

FOR THE YEAR ENDED 31ST DECEMBER 2024

27 FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

Financial Risk Management (Continued)

(i) Credit Risk (Continued)

Wholesale segment (Continued)

- If the debt from any roaming partner is aged more than 12 months, the amount which is aged more than 12 months, after netting off any payables from respective operator will be assessed for impairment.

The Group has recognized a specific impairment of MVR 4,073,923/- as at 31st December 2024 (31st December 2023: MVR 2,736,019/-).

Short term Investments

The Group limits its exposure to credit risk by investing in short term deposits with selected banks and investing in treasury bills. In respect of the short term investments, the Group has not recognized any allowance for impairment based on the materiality ground.

Cash and Cash Equivalents

The Group held cash and cash equivalents of MVR 503,924/- as at 31st December 2024 (31st December 2023: MVR 1,446,213/-). The Group limits its exposure to credit risk by maintaining its cash balances in selected banks.

The Group has not recognized any allowance for impairment for the bank balance based on the materiality ground.

(ii) Liquidity Risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial assets. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group's exposure to liquidity risk as at the reporting date is against the following liabilities.

^{*} Loans and borrowings excludes future interests.

FOR THE YEAR ENDED 31ST DECEMBER 2024

27 FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

(ii) Liquidity Risk (Continued)

The Group manages its own liquidity to meet its financial obligations of servicing and repaying external debt, dividends, Group costs and strategic initiatives. The principal source of liquidity for the Group is its operating cash inflows from the business, supported by bank finance.

The Management produces liquidity forecasts on a regular basis to ensure the utilization of current facilities is optimized that medium-term liquidity is maintained and for the purpose of identifying long-term strategic funding requirements. The Directors also regularly assess the balance of capital and debt funding of the Group.

(iii) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, equity prices and interest rates will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

(a) Interest rate risk

Treasury may seek to reduce volatility by fixing a proportion of this interest rate exposure whilst taking account of prevailing market conditions as appropriate.

Exposure to interest rate risk

At the reporting date, the interest rate profile of the Group's interest-bearing financial instruments was:

			Carrying Amount	
			31/12/2024 MVR "000"	31/12/2023 MVR "000"
Fixed Rate Instruments				
Fixed Liability - Loans			15,989	
Financial Assets - Short term investments			2,191,575	1,266,337
Variable Rate Instruments				
Financial Liabilities - Loans			809,791	835,607
	31/12	2024	31/12	/2023
Sensitivity Analysis	100bp Increase	100bp Decrease	100bp Increase	100bp Decrease
Variable Rate Instruments	8,098	(8,098)	8,356	(8,356)

Fair value sensitivity analysis for fixed-rate instruments

The Group does not account for any fixed-rate financial assets at FVTPL. Therefore, a change in interest rates at the reporting date would not affect profit or loss.

(b) Currency risk

Exposure to currency risk

The Group is exposed to the risk of available foreign currency for capital and operational purposes and also to the risk of movements in exchange rates in relation to foreign currency transactions (US Dollars, Euro, Sterling Pounds and Singapore Dollars). The Group receives certain collections such as roaming and interconnect in terms of foreign currency and on the other hand, the Group makes certain payments such as capex payments, dividends, out payments, roaming settlements, payments relating to group management in terms of foreign currencies.

Currency risk is managed by the Group's treasury function that monitors foreign currency cash inflows and outflows and its closing position on a daily basis. The Group also monitors its exposure to movements in exchange rates on a net basis. The Group currently does not use forward foreign exchange contracts and other derivative and financial instruments to reduce the exposures created where currencies do not naturally offset in the short term.

GBP (10% Movement)	133	(133)	118	(118)	

(iv) Capital Management

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Capital consists of stated capital and reserves. The Board of Directors monitors the return on capital as well as the level of dividends to ordinary shareholders. The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.
